Last Rites Are Held Here For R. Cecil Clepper

Local Fisherman's Body Is Found Beside Jeep After Search

Funeraal services were held at the Truckee Colonial Mortuary Wednesday morning at 11 o'clock for Robert Cecil Clepper, 47, widely known Truckee resident and businessman, whose body was found huddled beside his Jeep on Cottonwood Creek, Sierra County, Monday at noon, apparently the victim of a heart attack.

Clepper, for the past year manager of Rasco, Truckee electrical appliance and sporting goods store, left home at 11 o'clock Sunday for a fishing trip, advising Mrs. Clepper that he would return Sunday evening.

When he did not appear by dark, Mrs. Clepper notified Game Warden Tom Borneman and other authorities and a search was insituated. The deceased had not been in the best of health and some fears were felt for his safety.

The search, engaged in by scores of local friends of Clepper, continued throughout the night and shortly before noon Monday Warden Borneman came upon the Jeep with its owner beside it, still clutching his creel. It was believed he had spent the afternoon fishing and had started home when stricken.

The death of Clepper came as a severe shock to scores of friends throughout the area. He was known as an ardent sportsman and was well liked by all who knew him.

A native of Oklahoma, the deceased was born in Oklahoma Janceased was born January 11, 1908. For many years he was associated with the Civil Aeronautics Authority and was stationed on Donner Summit for several years. Both his parents are deceased and he is survived only by his wife, Vina, and a sister who arrived for the services.

Rev. Max Christensen of Nevada City, a friend of the family conducted the rites which the number of mourners and the display of floral pieces attested the esteem in which he was held.

Pall bearers were all close friends and included Walter A. Loynd, Irving Waters, Tom Borneman, Frank Quilici, Harry Barnes and Capt. C. E. Fox of Sacramento.

Graveside rites at the Truckee cemetery were conducted by Truckee Lodge No. 200, F&AM, Clepper being a member of the lodge in Kansas, where he resided before joining the CAA.

Besides the Masonic Lodge, Clepper was affiliated with the American Rifle Association.

After leaving his native Oklahoma, Clepper went to Kansas and there 20 years ago he and his wife were married. They went to Missouri for a time and then following his enlistment with the CAA he spent two years in Hawaii before coming here 9 years ago.

Coyote Frozen To Ice Provides Unusual Scene

Partial opening of the roads into Weber Lake, north of here, recently revealed one of the most unusual quirks of nature's violence.

A coyote had apparently started to cross the thinly frozen surface of Weber last winter when his feet broke through the ice. The continued freezing caught the animal fast and there he is—frozen fast to the surface for probably many months.

Among the first to witness the freak was Clarence Osburn of Truckee who drove into the Lake recently and the frozen coyote was called to his attention by Vern Johnson, manager of the property there. The coyote at first glance appeared to be a partly submerged log, Osburn said, but with the aid of binoculars, the ill-fated animal was clearly seen.

Donner Group Organizes For Mutual Benefit

Jack Waggoner To Head Association To Seek Uniform Rules

Fifty-eight property owners and residents of Donner Lake met at Donner Lake Lodge Friday night to form the Donner Lake Improvement Association and to name a committee of five to further the aims of the organization.

Heading the association is Jack Waggoner and other members of the board of governors are Jay Richards, Hap Warnke, Virgil Goodpasture and Gene Welsh.

The board met last night to formulate by-laws and discuss future plans. Regular meeting dates will be established and possibly committees named to assist in various phases of the proposed work designated for the future.

The officers of the group will meet with the Lawhatan Water Pollution board at Donner Lake Lodge at 10 a.m. June 24th for a discussion of a recent charge by state officials that poor drainage systems in the area are likely to cause pollution of the waters of the lake.

At the Friday meeting, Lee Nesbit of the Armstrong Realty, advised the property owners that the state department of health had made analysis of the lake water and reported no contamination had been discovered. This was done at the suggestion of the lake property developers when an unfounded rumor brought discredit to the lake waters.

One of the chief aims of the new organization will be to work with state, federal and county officials in an effort to have uniform regulations governing septic tanks, garbage removal and other kindred subjects. It was pointed out that this action is taken in a spirit of cooperation and for future guidance in building and developing lake properties. Some confusion in the past has existed, it was announced.

Following the meeting Friday night, refreshments were served and the group as a whole expressed the belief that considerable had been accomplished in advancing the future of the community.

Sun Beams

by WALTER BARRETT

Organization of the residents of Donner Lake into an association for the purpose of furthering the development of the area must be accepted as a good omen. Although in its infancy, there is considerable work to be done and it is sincerely hoped that the officers and members can work together in harmony for the mutual benefit of the entire region. We join in extending a sincere wish for the success of the Donner Lake Development Association.

With school vacations here and scores of youngsters milling around on bicycles and afoot, it is time to voice a warning to all motor vehicle drivers to use doubled caution. These youngsters are careless and often thoughtless and may often be in the wrong when they dash into the street or ride their bicycles illegally. The very fact that they may be in the wrong however, will not detract from the life-long regret of the driver if one is hit. Take a little more time and watch carefully for children at all times.

'Confession' Of Prisoner Spurs Probe Of Body

Officers Attempting To Solve Mystery From Tehama Clues

Local officers are communicating with Tehama County authorities in an effort to connect the alleged confession of a prisoner held in the county jaial there with the finding of two unidentified bodies in the Truckee river a few years ago.

Constable N. F. Dolley said he had received word from the Tehama authorities to the effect that a prisoner, John C. Freeman, 26, alias John and Charlie Kelly, stated that he killed a man "by beating him to death" and threw the body in a canyon near Lake Tahoe in 1948.

Freeman said, according to word received by Dolley, that he and an unidentified companion hitch-hiked a ride with the victim from Reno to Tahoe. He added that the victim was driving a black sedan with an Arizona license, and that he begged for his life when they beat him.

According to the story the victim had a wife and a small daughter in Arizona.

The prisoner is also quoted as saying he committed a kidnapping and robbery in Oakland shortly after the murder and that he served time in prison. About four months ago, Freeman is quoted as saying, he hit a man in the head at Stockton, robbed him of $34 and threw him off a pier. He said he thought the man got out of the water.

Two months ago, the alleged confession says, Freeman held up a market in San Franccisco and obtained $200.

Dolley said that two unidentified bodies taken from the Truckee river possibly could have been murder victims and he added he was going to cooperate with the Tehama authorities in an effort to learn more details immediately.

The bridegroom is Joseph Soares, son of Mr. and Mrs. John Soares of Tulare, with whom the couple will make their home for the time being. Following the wedding a reception was held for 35 guests. The Sathers are renting heir home for July and August but will arrive in September for a belated vactaion at Tahoe.

Had a nice chat with Dr. Monica Briner, in private life Mrs. Ralph Sears of Sunnyside Lodge, who has moved to Tahoe to make her permanent home although she will still return to DeWitt hospital every two weeks on a consultation basis. Dr. Briner is a radiologist and will cooperate with local doctors and expects to take advantage of the Taheo Forest Hospital's excellent x-ray equipment if her servicse are required. The Sears have rented their home at Auburn.

Lake Tahoe played host to a famous couple last week. They are honeymooners M. and Mrs. Virgilio Hilario, and she was the beautiful Miss Universe, formerly Miss Armi Kuusela of Sweden.

Imon Mitchell of Sunnyside returned home Sunday after a week end in the Marysville area where he went on business. His cmall son Dale accompanied him and visited at the home of his parental grandparents, Mr. and Mrs. Leonard Mitchell of Sutter.

Hal Sharrow is at Tahoe this week end preparing the family summer home for occupancy preliminary to bringing back his wife Joan and their three children, Linda, Jayne and Stephen for the summer. They reside in San Anselmo.

F. B. McKeever, D. C., and his wife of San Francisco have arrived at their Tahoe Pines summer home and plan to remain the year around. Dr. McKeever was born in Truckee and is a licensed chiropractor.

Have heard of some nice but not spectacular catches of trout since the season openel here—Tom Tostenson, manager of the service station at Cal-Neva caught a nice 7-pound mackinaw off the Tavern pier one day recently—Imon Mitchell brought in four, the largest a 7-pounder—and Steve Craig, old time fisherman of Tahoe who really knows his trout, brought in a modest catch of three four-pound mackinaw last weekend. Generally, fishing conditions are not the best, due to the cold, inclement weather which pre vails here.

Back for her usual summer sojourn at her Tahoe City home is Mrs. Alice Gebhardt who wintered at Tracy The unusually cold weather here has not been to comfortable for her injured left shoulder which suffered two broken bones during a fall.

Captain Bud Scott took his trim cruiser Tahoe out for its first trial spin of the season Friday. Aboard was a representative of a commercial photograph company who took a large number of colored photographs of the modern 43-foot cruiser which will be distributed widely this summer to the visiting public. Cold weather is preventing Captain Scott from setting a definite date for the start of summer operations of the cruiser Tahoe and his fleet of speel boats.

Mrs. Della Goss, who has been cooking for the help at Tahoe Tavern dining room, last Thursday had the misfortune o drop a crate of vegetables on her right foot, breaking a toe. She had it splinted up and is recuperating nicely, but on Monday had the added discomfort of a bad case of laryengitis.

Eddie Pemberton, Tahoe Pines carpenter, is in the Tahoe Forest Hospital following a heart attack more than a week ago.

Leave you for the week as the sun tries to break through cloudy skies, looks like summer weather just might be in the offing. Adios and the best of good cheer to you all. As vere—

Swanee.

Mrs. Biby says, "No matter how scattered our family may be, we never lose touch. The telephone connects us, night or day."

THE BIBYS' TELEPHONE: A MEMBER OF THE FAMILY

"Low-Cost Family Helper" is how the Edward Bibys describe their telephone

At eleven o'clock one night recently, the telephone rang in the home of Edward E. Biby, owner of a small Los Angeles mattress factory. His son Jim—a senior at USC—was calling. "Dad, my jalopy's broken down, and if I don't get my date back to her sorority house before midnight, we're both in the soup." Like other dads, Ed Biby jumped into his car and rode off to the rescue. Later, he said, "That's typical of how the telephone works in our home. It's a real member of the family."

Like other businessmen, Mr. Biby doesn't always find enough hours in the day to finish his work. But his home telephone permits him to make the few necessary evening telephone calls his business requires while he enjoys his family. And Mrs. Biby describes son Jim and daughter Jean as "telephone children," who make good use of the telephone in their school activities. Mr. Biby, speaking of the telephone, said, "There are few things we buy today that do so much—and cost so little."

At your service for pennies a call

The Bibys—like other families throughout the West—have found that while their taxes and the cost of most things they buy for their home have gone away up, telephone rates have remained low. So low, that the telephone still carries their messages for pennies a call. No wonder it's rated a bargain in the Bibys' budget.

....While the battle aginst TB in this counrty is gradulally bringing down the death rate from this disease, tuberculosis today kills more people in the Untied States than all other infectious diseases combined. A chronic disease easily spread from person to person, tuberculosis is a grave public health problem.

Yet tuberculosis is preventable and, while anyone can get it, no one need get it. Tuberculosis is a treacherous enemy and we have no fool-proof formula or set of rules which will guarantee an individual that he will never get the disease. But the TB germs, known as tubercle bacilli, find it harder to get a foothold and cause active disease in a person whose general health is good.

A person can maintain general health and keep body defenses high by eating regularly three well-balanced meals a day, dressing for the weather and avoiding unnecessary exposure to cold and wetting. When these wise practices become habitual, a person's body is less vulnerable to all disease producing germs, including the tubercle bacilli.

Another way to guard against TB is, of course, to avoid contact with those who have the diseace. But that isn't easy because not everyone who has TB is in a hospital. Many people who have TB in active form do no realize themselves that they are ill because TB has no obvious symptoms when it first strikes. So we can never be certain when we are, or have been, in contact with tuberculois.

But there is one way we can find out and this means the formation of another sound health practice. Everyone should see his doctor at least once a year for a thorough physical checkup, including a chest x-ray. If he does this, a person can be certain he is in good health, or, if serions illness is found, that it will be detected early. The chest x-ray can detect tuberculosis in its early stages, even before apparent symptoms appear, and the earlier tuberculosis is found, the easier it is to cure.

EDITOR'S NOTE— The mobile x-ray unit, giving free examinations to everyone, will be in Truckee June 17, at Tahoe City June 18, and at Kings Beach June 19, and everyone is urged to take advantage of this service.

CAR TRASH BAGS ARE BECOMING MORE POPULAR

The popular appeal for community effort in urging all motorists to carry trash bags is rapidly being taken up by a number of communities, according to the travel and recreation committee of the state chamber of commerce.

Motorists passing through Monterey, Pacific Grove and Seaside may secure a special trash bag from the chambers of commerce or any filling station. The bags are being furnished by the county board of supervisors.

Vacationists visiting Sequoia National Park will be furnished trash bags at the park entrance and are urged to deposit them before leaving the park.

Scouts attending the Boy Scouts National Jamboree at the Irvine Ranch in Orange County in July will drive over spotlessly clean highways. The Santa Ana branch of California Garden Clubs Inc. are putting on a special drive to secure community operation and the placing of special trash containers along highways leading to the ranch.

At San Diego, U.S. Highway 101 has a particular problem, along with other coastal areas. Daily offshore wind has plastered fences along the ocean shore with trash, holding it there in drifts. Recently a large billboard was erected for the San Diego Highway Development Association, asking the cooperation of motorists in eliminating the nuisance.

From the Kern County Board of Trade comes the good news that they are organizing a county-wide campaign to induce residents and visitors to practice the same good housekeeping while driving as they do at home.

Every California community is being asked by the state chamber to take action before the start of the vacation season.

Assembly Sidetracks School Bible Measure

SACRAMENTO — (CNS)— Renewed efforts to place the Bible in California public school libraries and classrooms has been sidetracked in the assembly.

After running into disagreement among members of the assembly over its provisions, the bill was sent back to the rules committee for further study.

The controversy arose over the language in the measure which would allow giving the Bible "a proper place" in certain course of study, such as "music, history and literature." Other members objected because the regulation contained no provision for allowing scriptures sacred to other religions to be placed in school libraries.

Toll Road Plan Is Turned Out By Group

SACRAMENTO — (CNS)— Toll road legislation as a patrial solution to California's highway problem has been turned out to pasture by the senate committee on governmental efficiency.

The measure, which would have designated the state highway commission to act also as a toll road commission, was sent to interim study on motion of Senator Randolph Collier of Yreka, a member of the committee.

Assemblyman Patrick D. McGee o fLos Angeles, author of the bill said his proposal was permissive and would not authorize the taking over of exisitng highways as toll roads.

The bill was the third toll road measure to die during the current session.

County Government Gets Major Portion Local Tax Dollar

Biggest share of the local property tax dollar in Nevada County for 1952-53 was levied for the county government, which got 46 cents out of the property tax dollar, California Taxpayers' Association said. Total levy for county purposes for 1952-53 reached $646,468 out of the $1,403,051 total local property tax levy in the county.

School districts in the county are taking 41 cents of the property tax dollar this year, with a total levy of $573,801. Cities in the county account for 11 cents of the local tax levy dollar, with a total of $159,680 for Nevada City and Grass Valley.

Special districts account for two cents of the property tax dollar, the levy for special districts totaling $23,102 for 1952-53.

Statewide, the public school districts this year — and every year since 1949-50 — are taking the biggest share of the property tax dollar, 42 cents out of the total. County governments account for 35 cents of the property tax dollar for 1952-53; city governments, 16 cents; special districts, seven per cent.

"One way to get property tax 'relief' for next year is to see that the huge increase in state support of public school districts is not dissipated in higher spending . . . but is used to reduce the local tax demand," the taxpayers' association declared.

A Famous American Ship

The SAVANNAH was the first steamship to cross the Atlantic. She "was a failure by almost every standard," according to the American Merchant Marine Institute. "And yet today, she is reckoned one of the world's most illustrious ships because of her history-making voyage begun May 22, 1819 from Savannah, Ga. Started as a sailing ship, the SAVANNAH was completed as a steamship. Sent over to Europe in the hope that she could be sold for a fancy price to the Czar of Russia, she found no buyer. Restored to a sailing craft, she blew ashore off Long Island when only three years old. Her arrival at Liverpool was marked by two episodes worthy of note. In one she was chased by a British revenue cutter whose master thought she was on fire, not dreaming she was a steamship. In the other she neatly confounded efforts of a British sloop of war to force her to lower the Stars and Stripes. The enterprise shown in her construction, and the intrepid character of her officers and crew are the proud inheritance of American Merchant Marine.

Famous waters make famous beers

FOR MANY CENTURIES, certain localities in Europe have been famous for their exceptional beers. Each of those places has enjoyed the advantage of a faultless type of rare brewing water. Here in the United States, a similar crystal pure brewing water was discovered near Olympia, Washington in 1895 and, on the site of these artesian wells, the Olympia Brewing Company was established. Here America's original light table beer was brewed and soon became famous for its distinctive character. Try Olympia today and discover its rare flavor and light refreshing quality, so like the renowned beers of the European continent.

EXPLANATION OF CHILD EMPLOYE GIVEN BY OFFICIAL

SAN FRANCISCO—Reports that federal labor laws prevent children getting summer vacation jobs are not entirely true, according to C. O. Atchison, who represents the U. S. department of labor's wage and hour and public contracts divisions in northern California.

The two principal federal labor laws with child labor provisions, he said, are the fair labor standards act and the Walsh-Healey public contracts act.

"The restrictions against use of oppressive child labor are written into the laws to protect the lives of our youngsters and to safeguard their health and well-ebing," Atchison said.

The Walsh-Healey act, he pointed out, bans employment of boys under 16 and girls under 18 years old to perform work on government contracts in excess of $10,000.

The restrictions in the federal wage and hour law on employment of children under 16 in agriculture the district is in session do not apply to agricultural employment during the vacation period, he said.

Establishments engaged in interstate or foreign commerce, or in the production of goods for such commerce, are subject to the child labor provisions of the federal wage and hour law, he added.

Atchinson pointed out that children must be at least 16 to work in manufacturing or processing occupations, in public messenger service and in occupations in rooms or work-places where goods are manufactured or otherwise processed.

Children 14 and 15 years old can do office and sales work, except on trains, motor vehicles, aircraft, vessels or other means of transportation, and can work only eight hours a day or 40 hours a week, and only between 7 a.m. and 7 p.m., he added.

Children under 18 years old can not work in occupations covered by the hazardous occupations orders issued under the federal wage and hour law, he stressed. The orders cover such occupations as driver or helper on motor vehicle, certain jobs in logging, sawmills, mines, plants making or storing explosives; slaughtering, meat-packing or rendering plants; jobs involving exposure to radio active substances, and jobs operating power driven wood working, metal forming, punching or shearing machines, elevators, hoisting apparatus, cranes, derricks, high-lift trucks and bakery machines, he said.

"Employers can protect themselves from inadvertant violations by having on file age certificates or work permits for all workers under 19 years old, because such certificates are considered as proof of age under federal and state laws," he added.

"Young workers should also find out about the legal minimum ages and other conditions of employment set by the state child labor laws. If the state laws have higher age limits and set higher standards than federal laws, then the higher standards will prevail.

"And when you take a summer time job, be sure it is safe, be sure you are old enough under the law to work in the job, and be sure you resume your education in your classrooms at the end of the vacation period."

Sliding County Roads May Get State Aid Under Terms of Bill

SACRAMENTO — (CNS)— Counties which have a slide problem with relation to road maintenance can expect some help from the highway maintenance funds of the state as a result of a measure on its way to the governor by Senator Don E. Grunsky of Santa Cruz county .

Under the provisions of the bill, Nevada County gets approximately $2,826 next year, or .00785 per cent of the total amount set aside to clear roads of rock and dirt slides..

PRISONERS WILL AGAIN AID WITH FIRE SUPPRESSION

The Tahoe National Forest will again have the benefit of a prison camp fire and work crew the coming work season. The camp will be composed of inmates from Folsom Prison and will start to work on the Forest on July 1. It will be of 25-man size plus additional men to cook and maintain the camp.

The men will be assigned to the Foresthill Ranger District, with the camp located at Greek Store, about 35 miles east of the town of Foresthill. They will work on timber Stand improvement work in areas cut over by the American River Pine Lumber Company cutting government timber in that area on a long-term sale. All men will be trained in fire suppression and will be available for fires throughout the entire forest and elsewhere in the case of large fires. Five of the inmates will be specifically trained, with a foreman, to act as a fast-moving first-attack crew.

This is the third consecutive year that such a camp has been on the Tahoe Forest. In 1951 a camp, operated in conjunction with San Quenten Prison, was located in the Downieville area and was at Brandy City. In 1952 a camp, out of Soledad Prison, was located at Graniteville.

Project Superintendent William Barnes of the regular Tahoe staff will be responsible for the camp this year. He is well-experienced in his work, having supervised a camp on the Lassen National Forest and the Graniteville camp part of last yaer.

These camps are operated under an agreement with the State of California Department of Correction. The Forest Service pays to the state a stipulated sum for each effectvie man day spent on the job. The Department of Correction, from sums received, pays for and operates the camp's subsistance, supervision costs, and all other expenses. These camps are operated upon an honor system and provide noe step in the program of rehabilitation of men confined in state prisons.

For the Forest Service, the camp provides a group of physically fit men doing essential forest improvement work, sepecially in the suppression of wild land fires. In the past years the camps have operated very successfully and have saved many times their cost in the protection of the National Resources of the State of California.
